Updated on 20th October 2026

Aayush Sarva

Engineering Manager · Platform & Backend Engineering · 10+ yrs · Leading globally distributed teams

aayushsarva.com checkaayush@gmail.com linkedin.com/in/aayushsarva github.com/checkaayush

SKILLS

Languages
Python, Golang, JavaScript

Platform & Infra
Kubernetes, Docker, Terraform, AWS/GCP, multi-cloud orchestration

Observability & Reliability
OpenTelemetry, Prometheus, Grafana

Data Stores
PostgreSQL, ClickHouse, Redis

AI & Tooling
LLMs, AI agents, MCP, Claude Code, AI-native SDLC

ACTIVITIES

Architrace
Building a digital office for Architects
architrace.lovable.app

Speaker
Spoke about performance optimizations & cost efficiency in distributed systems at:

Boston Golang Meetup | Jun '23

SysConf by SysDsgn | Sep '23

AsliConf | Sep '23

EDUCATION

THE LNM INSTITUTE OF INFORMATION TECHNOLOGY

Bachelor of Technology
Communication & Computer Engineering
Jul '12 – May '16
CPI: 8.52 / 10.0

EXPERIENCE

ATLAN — Remote

Atlan provides the context layer for enterprise AI.

Engineering Manager, Platform | Oct '23 – Jun '26

- Led a globally distributed platform engineering group of up to 10 engineers across two teams
- Grew the team: hired [TBC: 5–8] engineers, converted [TBC: 2–3] interns to full-time & helped [TBC: 3–4] engineers earn promotions
- Ran the internal multi-cloud tenant orchestration & release management platform (750+ tenants, 200+ internal users), [TBC: what changed] to [TBC: business outcome]
- Increased weekly tenant onboarding success from 70% to ~100%, whilst reducing tenant onboarding time from 24+ hours to <2 hours
- Introduced incident management & on-call practices, then led the move to AI-native incident management on incident.io, where [TBC: what the AI did], cutting incident mitigation time from 3+ hours to <15 minutes
- Owned terabyte-scale centralized observability stack, increasing availability to 99.9% & reducing cost by ~15%
- Raised platform availability to 99.99% & made tenant backup & restore more resilient, cutting recovery time from 10+ hours to <3 hours, [TBC: business outcome]

PLIVO — Remote

Plivo provides AI agents for multi-channel business communications.

Engineering Manager, Messaging | Jan '23 – Sep '23

- Eliminated multi-week migration effort across teams by decoupling application observability from providers using OpenTelemetry
- Reduced onboarding time for new engineering hires from 4+ weeks to <2 weeks by revamping the technical onboarding experience

Software Engineer III, Messaging | Jul '21 – Dec '22

- Improved p99 latencies by up to 10x using query batching, better DB indexes, caching & granular observability
- Brought down cloud costs by ~6% (saving 1000s of $ per month) using fine-tuned autoscaling, batched SQS requests & Graviton instances

Software Engineer II, Messaging | Nov '19 – Jun '21

- Implemented dynamic SMS routing to improve delivery by 3% & profit margins by 13% whilst automating 20+ hrs of manual work per week of ranking telecom carriers for quality of service

SOCIALCOPS — New Delhi

SocialCops helps organizations embrace data intelligence.

Senior Software Engineer, Collect | Jun '16 – Oct '19

- Owned the data export service: added configurability (filters, email data archives & multiple file formats), reduced export time from 5+ hours to <1 hour & added integrations with Google Sheets & Zapier
- Built sub-second search & analytics capability using Elasticsearch
