Experience

Atlan Remote

Atlan provides the context layer for enterprise AI.

Engineering Manager, Platform *Oct '23 – Jun '26*

- Led a platform team of 10 engineers, owning hiring, performance, architecture decisions & the roadmap
- Owned the internal multi-cloud tenant orchestration & release management platform (750+ tenants, 200+ users)
- Reduced tenant onboarding time from **24+ hours to <2 hours** (success rate 70% → ~100%), bringing prospect time-to-value under a week vs. competitors' multiple weeks
- Cut **mean incident mitigation time from 3+ hours to <15 minutes** by establishing incident management, then leading the **shift to AI-native incident response** with an AI SRE agent embedded in Slack
- Helped unlock our **first $1M+/year enterprise deal** by contributing to 99.99% platform availability and revamping tenant backup-restore for better reliability & quicker disaster recovery (10+ hours → <3 hours)
- Owned the terabyte-scale centralized observability stack, increasing reliability and reducing cost by ~15%

Plivo Remote

Plivo provides AI agents for multi-channel business communications.

Engineering Manager, Messaging *Jan '23 – Sep '23*

- **Eliminated multi-week observability vendor migrations**, reducing them to config changes via OpenTelemetry
- Cut new-engineer ramp-up time from 4+ weeks to <2 weeks by revamping technical onboarding
- Spoke at Boston Golang Meetup, SysConf by SysDsgn & AsliConf on lessons from performance & cost optimization

Senior Software Engineer, Messaging *Nov '19 – Dec '22*

- **Reduced p99 latencies by up to 10x** using query batching, better DB indexes, caching & granular observability
- **Cut cloud costs by thousands of dollars/month** (~6%) via tuned autoscaling, SQS batching & AWS Graviton
- **Raised SMS delivery 3% & margins 13%** via dynamic routing, automating carrier ranking (20+ hours/week)

SocialCops New Delhi

SocialCops helps organizations embrace data intelligence.

Senior Software Engineer, Data Platform *Jun '16 – Oct '19*

- Owned the data export capability: reduced export time for large datasets from 5+ hours to <1 hour, added configurability (filters & file formats) and integrations with email, Google Sheets & Zapier

Skills

Languages: Python, Golang, JavaScript

Platform & Infra: Kubernetes, Docker, Terraform

Observability & Reliability: OpenTelemetry, Prometheus, Grafana

Data Stores: PostgreSQL, ClickHouse, Redis

AI & Tooling: AI agents, MCP, Claude Code, AI-native SDLC

Projects

Architrace: Building an AI-native digital assistant for architects (architrace.lovable.app)

Education

The LNM Institute of Information Technology CPI: 8.52 / 10.0

Bachelor of Technology, Communication & Computer Engineering *Jul '12 – May '16*
